PROFESSIONAL PROFILE

Ms. Mina Suh is an Associate Director and Managing Epidemiologist with EpidStrategies and has 15 years of experience in protocol development, study design and conduct, statistical analyses, and interpretation of epidemiology studies of cancer, birth defects, asthma, and infectious diseases. She regularly conducts systematic literature reviews, occupational cohort mortality studies, and safety evaluations of medical devices and consumer and pharmaceutical products. Ms. Suh also manages large-scale research programs studying infectious diseases, including respiratory syncytial virus (RSV) in infants and children, with multi-faceted components that include systematic literature reviews, secondary data analyses, primary data generation, and evidence synthesis and integration.

Ms. Suh has published over 40 papers in journals that include *Journal of Infectious Diseases*, *Open Forum Infectious Diseases*, *Critical Reviews in Toxicology*, *Toxicological Sciences*, and *PLoS One*. Her work on RSV has been cited by the Centers for Disease Control and Prevention (CDC), US Food and Drug Administration (FDA), and various public health agencies. She serves as a peer reviewer for *Pediatrics*, *Journal of Infectious Diseases*, *Open Forum Infectious Diseases*, *Critical Reviews in Toxicology*, *Toxicological Sciences*, *Food and Chemical Toxicology*, *Journal of Exposure Science and Environmental Epidemiology*, *Regulatory Toxicology and Pharmacology*, and *Frontiers in Public Health*.

Based on her body of work with metals toxicology and epidemiology, she served as a member and rapporteur of the ECVAM EURL External Scientific Advisory Committee on Bioelution in 2019–2020. She also served as a member of the OECD Expert Workgroup on Metal Release, representing the United States, in 2019–2024

EDUCATION AND DEGREES EARNED

M.P.H., International Health, Boston University

B.A., Molecular Cell Biology, University of California, Berkeley

PROFESSIONAL ACTIVITIES AND HONORS

2019–2024	OECD (Organisation for Economic Co-operation and Development), Expert Workgroup on Metal Release
2019–2020	EURL ECVAM (European Union Reference Library, European Commission), External Scientific Advisory Committee Working Group on Bioelution
2014	Society of Toxicology, Annual Conference — Top 10 Risk Assessment Presentations
2013	Society of Toxicology Risk Assessment Specialty Session (RASS) — Top 10 papers of 2012
2012	Society of Toxicology Risk Assessment Specialty Session (RASS) — Top 10 papers of 2011
2005–2007	Alumni Scholarship, Boston University
1998–2002	William Byrd Scholarship, University of California Berkeley

SELECTED PROFESSIONAL EXPERIENCE

Epidemiology

Designed study protocols for active surveillance and secondary data analyses of RSV in US infants and children.

Conducted systematic literature reviews for burden of disease, healthcare utilization, and mortality for RSV and all-cause bronchiolitis (ACB) among US infants and children.

Constructed analyses of breast cancer science and clinical research developments and submitted public comments to federal agencies. Evaluated the efficacy and safety of therapeutic breast cancer agents in drug development, with preclinical and clinical data analysis and interpretation. Analyzed experimental protocols of Phase III oncology trials.

Assessed potential associations between health effects and occupational and environmental exposures to heavy metals, including hexavalent chromium, titanium dioxide, cobalt, and nickel.

Evaluated cancer and birth defects data at the national, state, and county levels to assess community health and disease trends.

Analyzed National Health and Nutrition Examination Surveys (NHANES) to characterize thyroid hormone effects from environmental exposures to goitrogenic chemicals).

Toxicology and Risk Assessment

Prepared toxicological review of scientific literature and databases of regulatory agencies to develop carcinogenic modes of action and characterize cancer biomarkers of environmental exposures to heavy metals.

Supported development of physiologically based pharmacokinetic (PBPK) models for mice, rats, and humans orally exposed to chromium. Prepared materials to develop dose-response, exposure, and site/product-based risk assessment in accordance with federal agency guidance and regulation.

Drafted technical memos and reports to state and federal regulatory agencies that assessed the cancer risk of environmental exposures to chemicals, particularly, pesticides and heavy metals.

Designed and developed bioaccessibility and relative oral bioavailability studies of cobalt and nickel.

Prepared technical materials for Proposition 65 compliance.
